

HSv726 MultiGigabit WiFi Controller

Fast, dependable WiFi for your busiest properties.

Our most powerful controller connects to today's multi-gig fiber and cable service and delivers it to every guest and staff member, so streaming, video calls and point-of-sale all keep up, even at peak occupancy.

19-inch, 1U rack-mount unit. Two 10Gb fiber (SFP) ports and six 2.5Gb Ethernet ports.

8 Gbps

System throughput

7 Internet connections

With automatic failover

2 × 10Gb

Fiber-ready SFP ports

6 × 2.5Gb

Multi-gig Ethernet ports

BEST FOR Large hotels, resorts, campgrounds and RV parks, campuses and high-traffic venues

- 
Built for multi-gig internet
 Get the full speed you pay for, with 10Gb fiber ports ready for your next upgrade.
- 
Stays online
 Combine up to seven internet lines. If one goes down, traffic moves to the others automatically.
- 
Your brand, not ours
 Fully custom login pages with no vendor ads. Run separate guest, staff and event networks.
- 
We watch it for you
 24/7 monitoring with outage alerts, automatic updates and optional live 24/7 support for your guests.

Works with CheckBox AX and NX series meshing access points as well as many third party APs. Third party AP capabilities will vary. Technical specifications on reverse.

Processor	4 cores	Form factor	19" 1U rack mount, rack ears included
Fiber ports	2 × 10Gb SFP	Dimensions / weight	1U · 9 lb
Ethernet ports	6 × 2.5GbE (10/100/1000/2500)	Power	120 VAC · 40 W typical
Port roles	1 WAN · 1 LAN · 4 configurable	Operating temp	0–70 °C (32–158 °F)
Internet connections	Up to 7, load sharing with automatic failover	Management	Web-based GUI, on-site or remote
Wireless networks	Up to 4 (MultiNet)	Warranty	1 year

INCLUDED CHECKBOX PLATFORM FEATURES

Guest experience

Branded login pages. Featuring your design, update login pages from your CheckBox control panel or integrate into your CMS.

Flexible access. Free, time-limited, tickets, credit card, Perma Codes or API.

Seamless roaming. Devices hand off between access points as guests move.

Domain white list. Chosen sites open without logging in.

Network & reliability

Load sharing & failover. Spread traffic across up to 7 internet lines.

Self-healing mesh. Redundant links route around a failed node.

Wired or wireless nodes. Self-configuring mesh for fast, low-cost installs.

Bandwidth control. Per-user throttling, plus torrent inhibiting to stop file-sharing from hogging the line.

Revenue & integration

PMS integration. Connects with your property management system.

Loyalty & rewards. Link WiFi access to your rewards program via API.

S/A/F/E. The Survey And Feedback Engine gathers guest feedback.

MultiNet. Up to four networks from one controller and one set of access points.

Management & support

Remote admin. Manage from any browser, on-site or off.

Management VPN. No port forwarding, static IPs or DMZ setup.

24/7 monitoring. Text or email alerts if anything goes down.

Automatic updates. Software stays current, no site visit needed.

Optional live guest support. Around-the-clock help line for your guests.

Security & compliance

Client isolation. Guests can't see or reach each other's devices.

Separate staff networks. Encrypted networks for management and property use.

PCI-friendly. Runs inside or outside of your corporate network infrastructure.

Firewall & filtering. Built-in firewall; works with content-filtering services.

VPN support. Guests can connect to their own corporate networks.

Works with

AX/6000i · indoor ceiling
AX/6000mini · outdoor, edge nodes
AX/6000 MAX · high-density anchor
NX series · earlier models
Many third party APs · capabilities vary

In the box

HSv726 controller, rack ears, power cord

Specifications subject to change. Access points require a CheckBox gateway controller.
