checkbox Building Better WiFi

GATEWAY CONTROLLERS · SMALL & MID-SIZE

HSv440 WiFi Controller

Smaller. Faster. Silent.

The successor to the HSv430: a smaller, faster WiFi controller. Give guests fast, branded WiFi while staff stay on their own secure network.

Compact, fanless controller with four Gigabit Ethernet ports: one Internet (WAN) port and three LAN ports.

1 Gbps	4	4	3
Throughput	**Gigabit ports**	**Wireless networks**	**Guest portals**
Up to 1 Gb	1 WAN · 3 LAN	From one set of access points	Separate captive portals

BEST FOR **Motels, inns, smaller campgrounds & RV parks, restaurants, bars, marinas & function halls**

Silent, compact, all-in-one

No fan, no noise, in a smaller box that fits on a shelf or behind the desk. No dedicated computer needed.

Safe for guests and staff

Guests can't see each other's devices, and staff get their own encrypted network.

Your brand, not ours

Fully custom login pages with no vendor ads. Run separate guest, staff and event networks.

We watch it for you

24/7 monitoring with outage alerts, automatic updates and optional live 24/7 support for your guests.

Works with CheckBox AX and NX series meshing access points as well as many third party APs. Third party AP capabilities will vary. Technical specifications on reverse.

HSv440 Technical details

SOFTWARE RELEASE 4.600+

SPECIFICATIONS

System throughput	Up to 1 Gbps
Ethernet ports	4 × Gigabit (10/100/1000)
Port roles	1 WAN · 3 LAN
Wireless networks	Up to 4 (MultiNet)
Guest portals	Up to three separate captive portals
Cooling	Fanless, passive (silent)

Dimensions	5 × 5.25 × 2 in
Power	120–240 VAC · ~15 W
Operating temp	0–105 °F (−18–41 °C)
Management	Web-based GUI, on-site or remote
Warranty	1 year

INCLUDED CHECKBOX PLATFORM FEATURES

Guest experience

Branded login pages. Featuring your design, location or region specific; update from your CheckBox control panel or integrate into your CMS.

Flexible access. Free, time-limited, tickets, credit card or Perma Codes.

Works with any device. No settings to change on guest devices.

Domain white list. Chosen sites open without logging in.

Revenue & integration

PMS integration. Connects with your property management system.

Loyalty & rewards. Link WiFi access to your rewards program via API.

S/A/F/E. The Survey And Feedback Engine gathers guest feedback.

MultiNet. Up to four networks from one controller and one set of access points.

Security & compliance

Client isolation. Guests can't see or reach each other's devices.

Separate staff network. Encrypted network for management and property use.

PCI-friendly. Runs inside or outside of your corporate network infrastructure.

Firewall & filtering. Built-in firewall; works with content-filtering services.

VPN support. Guests can connect to their own corporate networks.

Network & reliability

Self-healing mesh. Redundant links route around a failed node.

Wired or wireless nodes. Self-configuring mesh for fast, low-cost installs.

Seamless roaming. Devices hand off between access points as users move.

Bandwidth control. Per-user throttling, plus torrent inhibiting to stop file-sharing from hogging the line.

Management & support

Remote admin. Manage from any browser, on-site or off.

Management VPN. No port forwarding, static IPs or DMZ setup.

24/7 monitoring. Text or email alerts if anything goes down.

Automatic updates. Software stays current, no site visit needed.

Optional live guest support. Around-the-clock help line for your guests.

Works with

AX/6000i · indoor ceiling
AX/6000mini · outdoor, edge nodes
AX/6000 MAX · high-density anchor
NX series · earlier models
Many third party APs · capabilities vary
